

## MORE DITCH DIGGING

## Appropriators Canal Co. Will Start a New Camp Near Alhambra.

The stockholders of the Appropriators Canal company held a meeting at Alhambra on Monday and decided to increase their activity in ditch digging. The embarrassment to the Arizona Water company through the trouble at the dam was the main reason for this move, for it is altogether likely there will be but little water available from that source for some time, and it will soon be the time of year for new planting, in addition to the constant demand for stock water.

The action of the company, it is understood, is no reflection on the conduct of Grant Brothers, who are already proceeding with good success in the performance of their contract and are excavating about a mile and a half of ditch per week. But their contract only runs to some point in the vicinity of Alhambra, and the Appropriators figure that if they can have a large section of ditch dug beyond Alhambra by the time the contractors finish their work, they will be able to get water much sooner to a great many of their stockholders who will be in great need of it.

They propose, therefore, to put about seventy-five teams at work this morning, and probably more will be added in the days that follow. It is rather the dull time of year for the farmers just now, and they can spare teams better than at some other times and use them also to better purpose. This excavation will be carried on by men each having a personal interest in the work and with good heavy teams used to that kind of business.

## MINES AND MINING

## Things Going on Under Ground in Various Localities.

## COCHISE COUNTY.

The station on the 800 foot level of the Shattuck-Arizona mine at Bisbee will be completed by the end of the present week. Immediately upon the completion of this work drifting will commence. Drifting will also be resumed on the 700 foot level. The drift work was suspended in porphyry, but a crosscut will be made to the ore. The 700 foot level has about 150 feet of ore and ledge matter in its 230 feet of development. Water is gaining steadily at the 800 and it is not probable that there will be further sinking in it until a big pump is installed and two more boilers added to the power equipment. The new pump will be stationed on the 800 foot level. The pumps that are now employed at the mine have about all they can do to handle the water coming in, which is from 175 to 200 gallons per minute. In view of this necessary equipment it is considered likely that operations in the mine will be confined most of the fall and winter to development work on the 700 and 800 foot levels.

The sinking going on at the Black Eagle mine at Tombstone has developed a wide vein of ore, most of which, however, is of too low grade without careful reductions. Additional work is

to be done to open a body that will pay to ship without treatment and reduction, as the ore is growing in value and the best of other indications exist to this end.

## COCONINO COUNTY.

Representatives of the Boston, Mass. company that has bonded the White Mesa copper property were in Flagstaff this week making further preparations looking to the working of the properties. The group of claims under bond was experted some weeks ago, and the reports of the two experts were entirely satisfactory to the company. The Standard Iron company, who is operating gold and silver mines at Meteor mountains have met with some new encouragement of late in the opening up of some large and rich ore mines.

## MOHAVE COUNTY.

The Victor and Virgin mines at Vivian are having deep shafts sunk to penetrate the ore bodies at considerable depth. This work of finding more and better ore is being done under the advice and judgment of Thomas Ewing, than whom there is no better judge of mines in the west. The Hot Tamaile mine at Chioride is soon to be equipped with a new steam hoist, power drills and other paraphernalia necessary for deep and effective development. The mine was sunk upon in good ore as far as a rope and windlass could do the work, and then Mr. T. B. Scott, the owner suspended operations and departed for Chicago for machinery for better equipment.

A mill is promised for the old Fay mine, four miles west of Kingman as soon as levels have been run and ore blocked out. The present shaft has been in course of sinking and developing for some time by a small force of miners and the ore values have increased very materially.

J. D. Spargo, superintendent of the West Gold Road mine at Acme, in San Francisco district, is getting along very speedily in the sinking of the 500 foot shaft to tap the extension of the Gold Road vein.

Captain W. H. Hardy, the pioneer miner of Mohave county, is dying in Whittier, California, where he was conveyed a short time ago in an almost helpless condition. In a letter to the Kingman lodge of Elks, he says he will never see his friends again, his attending physician advising him that his end was near. The Kingman lodge of Elks has made arrangement for his case and will bring the body back to Kingman should he die. Capt. Hardy came to the territory in the year 1878 with the United States troops and served in the capacity of post traveler, freighter and scout during the turbulent times with Apache Indians. Later he began mining in Mohave county and made and lost more than one fortune. For the past ten years he had resided in Kingman and while not possessing a superfluous amount of means and money had sufficient to keep him in easy circumstances. Capt. Hardy was quite widely known in Arizona and should his death occur as now appears so imminent it will be deeply deplored by a wide circle of true friends.

## SENATOR BEVERIDGE'S STATE.

To the Editor of The Republican, Sir: It is no longer a wonder that Senator Beveridge has reached such altitudinous political heights, for he belongs to a

## FALL and WINTER DRESS GOODS!

## SICILIAN

52 inch black mohair Sicilian. Lustrous finish, worth 90c, today, for

## NOTICE OF SALE.

To Pablo Moreno: You are hereby notified that there is due from you, to the undersigned, the sum of \$25 for the pasturage, since the first day of May, 1904, of one bay colt, three years old, and the sum of \$25 due from you to the undersigned for the pasturage of one sorrel mare, 10 years old, since Feb. 23, 1904, making in all the sum of \$50 due from you to me for the pasturage of said two described animals. Which pasturage was furnished by me at your special instance and request, that more than twenty days prior to this publication took possession of said animals on account of the non-payment of the above named charges for pasturage in pursuance of a lien which I claim upon said animals for said pasturage. And you are hereby further notified that on Friday, the 15th day of September, 1905, at the hour of 2:30 o'clock of said day I will sell said animals at public auction, at the farm house on the northeast quarter of section thirty-six, township two north, range three east, in Maricopa county, Territory of Arizona, to pay said pasturage bill and the costs of said sale.

MRS. R. E. WILSON.  
Dated Sept. 12, 1905.

## NOTICE OF SALE.

To one Henderson, whose first name is unknown to the undersigned. You are hereby notified that there is due from you to the undersigned the sum of \$38 for the pasturage, since the 12th day of November, 1903, of one strawberry roan horse, four years old, which pasturage for said horse was furnished by me at your special instance and request; that more than twenty days prior to the publication of this notice I took possession of said horse on account of the non-payment of the above named charges for pasturage in pursuance of a lien which I claim upon said horse for said pasturage. And you are hereby further notified that on Friday the 15th day of September, 1905, at the hour of 2:30 o'clock p. m. of said day, I will sell said horse at public auction at the farm house on the northeast quarter of section thirty-six, township two north, range three east, in Maricopa county, territory of Arizona, to pay said pasturage bill and the costs of said sale.

MRS. R. E. WILSON.  
Dated Sept. 12, 1905.

## DISGRACE TO BE UNMARRIED.

An unmarried woman in Russia regards her condition as a disgrace, and when the case seems hopeless, the girl leaves home and enters a convent, making a virtue of necessity.

"I see that a woman's dearest wish has been formed in Philadelphia." "How is it to be conducted?" "Why, I suppose they meet once a week and play whist."—Cleveland Plaindealer.

## AMUSEMENTS

"Magda" was the bill last night at Eastlake park and the powerful play of Sudermann was skillfully handled by the capable company. Miss Tucker in the title role was superb. The Desmond trio presented a new act which was well deserving of the applause received. The illustrated songs were especially beautiful. Tonight is amateur night and all applications must be made to Mr. Berger at the box office or at Mr. Sanichas' store before noon today. Tonight Quosena will be the bill. Tomorrow night "The Gallie Slave." Friday, "Carmen," and Saturday night "Jesse James."

## RETURN OF THE FAVORITES.

The opening attraction at the Hardwick theatre will be the well known Beggar Prince Opera company for a week's engagement, including a Saturday matinee, starting Monday, September 18. During the week they will present a repertoire of the most popular operas, most of which are new to Phoenix theatregoers. "The Pret Persian," Francis Wilson's great success, will be the offering Monday night, to be followed by Fernand's "Chimes of Normandy," "Fra Diavola" and others equally as well known. This is undoubtedly the most popular organization that ever visited Phoenix, and the many friends of Mr. Wade and his clever company will look forward with pleasure to their coming. Prices will be 25, 50 and 75 cents. Seats on sale at Goodman's drug store.

## ADIRONDACK GUIDE.

A famous Adirondack guide, in the days when that mountain region was a true wilderness, has just died at the age of 95. William McLoughlin was in charge of the horses of the government stock farm on Long Island. H. E. Willis of Agua Caliente arrived in the city yesterday from the coast, where he has been spending the summer. He will return to Agua Caliente in a day or two and reopen his hotel there.

W. A. Drake, George Tisdale, Prescott; Hiram Steele, Porter Steele, New York, registered at the Hotel Adams last night.

Those registering at the Hotel Adams yesterday were: Dr. Esta Cook, Tombstone; George C. Hunt, Washington, D. C.; C. W. Hague, Des Moines, Ia.; J. W. Pierce, San Francisco; L. Goodfriend, Philadelphia.

J. B. Holloway of San Francisco registered at the Ford hotel yesterday. Clayton Bennett left for Washington, D. C., yesterday, via the S. F. P. & P.

Those registering at the Commercial hotel yesterday were: H. C. Storey, Prescott; J. M. Burkett, Columbia; E. D. Brady, Goldfield; L. Cohn, S. Nims, Rudolph Levi, Los Angeles.

W. Y. Price of Florence was in the city yesterday, leaving for the south last night.

F. W. Straahoff, for Los Angeles; D. D. Horning, for Portland, were passengers on last night's southbound M. & P. train.

## THE GRAND CANYON FROM THE PAINTER'S VIEW POINT.

Those who have admired Fernand Lungen's beautiful pictures of the Grand Canyon in the September McClure's, will be interested in the artist's own view of the task he has set himself. He wrote while he was at work upon the pictures—which, by the way, it took him over a year to paint—"It is an insane thing to try to paint this thing; I knew it, but had hopes. There are a number of difficulties which this subject possesses unlike others. You have a most delicate, unreal fantasy presented on a most gigantic scale, with absolutely nothing to make it intelligent to any one not having seen it. How am I going to make one believe that in the drawing of the inner gorge that the walls are 1,500 feet above the rim; that sunlight is, as it were, swallowed up by this

Knecker—Why do you call the engagement ring the cat?  
Bocker—Because it always comes back.—N. Y. Sun.

Office Boy—Why, cert. I want more pay. I'm only gettin' "four" a week, and I give my mother all I earn.  
Proprietor—What do you do with the other three and a half?—Puck.

## SCIENCE VS. DR. OSLER.

Those who were touched on a tender spot by Dr. Osler's now famous joke on the chloroform cure for the unfortunate who have passed forty, may find consolation and encouragement and hope in a remarkable article in the September McClure's which is the latest edition of science on the length of human life.

Professor Elle Metchnikoff, a great biologist, tells through E. S. Carlane, of the wonderful discoveries by which

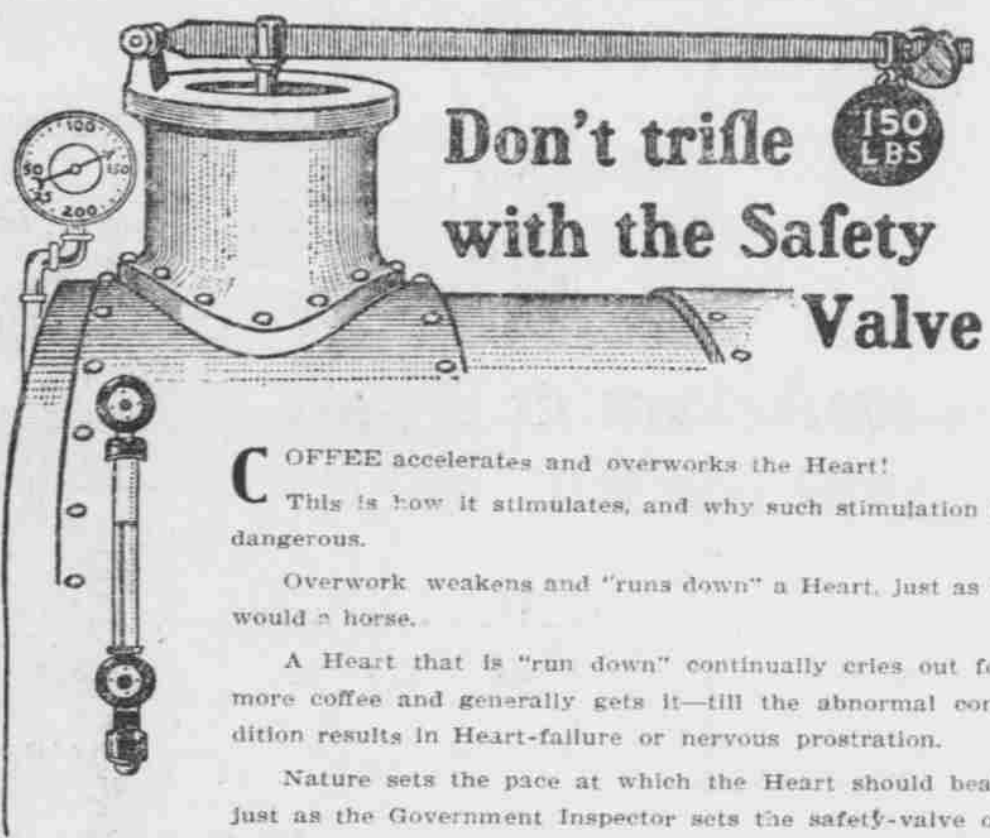

the prime of life may be prolonged. It has been definitely determined that old age is a disease which may be fought off, and the professor hopes that man will no longer be cut off just as he has passed out of maturity and reached his prime, but will live on in his strength, like some old oak or elm that, having reached its maximum, retains it with scarcely the freshening of decline for score after score of years.

Dr. Osler, beneath his jest, was seriously of the opinion that the world's effective vitalizing work is done between the ages of 25 and 40. Professor Metchnikoff, himself 64 years old, believes that the world suffers chiefly from immaturity. In an age which for

long enough has been progressing the insensate value of the young man, he congratulates himself that through medical progress the balance of power may be given to those whom we now call the old.

## ALFONSO'S BROTHERLY SOLICITUDE.

King Alfonso of Spain is anxious that his sister, Princess Teresa, become the wife of his widowed brother-in-law. Although it is against the rules of the Roman Catholic church for marriage to be contracted with a deceased wife's sister, it is believed that special permission will be granted in this case.

Don't trifle  
with the Safety  
Valve

## COFFEE accelerates and overworks the Heart!

This is how it stimulates, and why such stimulation is dangerous.

Overwork weakens and "runs down" a Heart. Just as it would a horse.

A Heart that is "run down" continually cries out for more coffee and generally gets it—till the abnormal condition results in Heart-failure or nervous prostration.

Nature sets the pace at which the Heart should beat, just as the Government Inspector sets the safety-valve on a steam boiler—at the highest pressure which it can safely carry.

Tampering with the "safety valve" is risky.

"Coffee heart" is the penalty for forcing, (with coffee), more work from Heart and Nerves than food supports them in doing.

And—Coffee-heart now debars many people from getting life insurance—an ominous fact worth pondering over.

Postum cures "Coffee heart" and rebuilds Nerve tissue, while having the rich flavor of fine old Government Java.

Because—Postum is made from the outer coats of Wheat, in which are located the Phosphate of Potash that feeds Brain and Nerve up to normal condition, so that they feel as good all day as coffee makes them feel for a few minutes in the day.

These outer coats do not give up their full contents of Phosphate of Potash, except by thorough boiling—as in Postum.

"Coffee heart," dyspepsia, and nervousness, generally disappear when "Postum" has displaced Coffee six weeks.

A ten-day trial will show marked improvement.

## There's a Reason

**Postum**  
Food Coffee

## Taste the Test

UNIFORMLY good taste is the infallible sign of well-brewed beer!

It demonstrates the use of the very best Barley-Malt, highest grade Bohemian Hops, special culture Yeast and thoroughly filtered Water. The best tasting beer is

**Budweiser**  
"King of Bottled Beers"

It always tastes the same.
